<i>About the Author</i>	<i>xv</i>
<i>About the Technical Reviewer</i>	<i>xvi</i>
<i>Acknowledgments</i>	<i>xvii</i>
<i>Preface</i>	<i>xviii</i>

***Chapter One Introduction*.....1**

<i>Who Should Read This Book</i>	<i>1</i>
<i>Navigating This Book</i>	<i>2</i>
<i>Presentation Plan</i>	<i>3</i>
<i>Linux Benefits</i>	<i>3</i>
<i>Open Source Software</i>	<i>5</i>
<i>The Greening of Linux</i>	<i>7</i>
<i>The State of Linux Today (and Tomorrow)</i>	<i>9</i>

***Chapter Two Installation*.....11**

Lesson 2-1.

<i>The Different Flavors of Linux and the Linux Desktop</i>	<i>11</i>
Linux Distributions	<i>11</i>
Linux Desktops	<i>14</i>

Lesson 2-2.

<i>Obtaining Linux Preinstalled</i>	<i>15</i>
Dell	<i>15</i>
Compaq	<i>16</i>
QLI Tech Linux Computers	<i>16</i>
Lesson Review	<i>16</i>

Lesson 2-3.

<i>Installing Linux Yourself</i>	<i>17</i>
Which Section to Read First	<i>17</i>
Installing Red Hat 7.2 in Detail	<i>19</i>
Disk Partitioning Guide	<i>30</i>
Lesson Review	<i>33</i>
<i>What's to Come</i>	<i>34</i>

Chapter Three	An Introduction to Linux and the Desktop	35
Lesson 3-1.		
Logging In, Starting the Desktop, and Shutting Down		37
Lesson 3-2.		
Initial Configuration with Setup at the Command Line		40
Lesson 3-3.		
Accessing CDs and Floppies from the Desktop and from the Terminal		42
Mounting and Unmounting CDs and Floppies		42
Mounting and Unmounting CDs and Floppies from a Terminal		43
Mounting and Unmounting CDs and Floppies from GNOME		44
Lesson 3-4.		
An Introduction to the Linux Desktop		44
The Main Menu Structure and Window Controls		44
The Panel, the Pager, and the Linux Desktop Paradigm		48
Customizing the Panel and Its Applets		51
Desktop and Panel Icons and Applications		54
Floppy Disks and CDs: A Simple Scenario		57
Lesson Review		59
What's to Come		59
 Chapter Four	 Connecting to the Internet	 61
Lesson 4-1.		
Configuring New Networking Hardware		61
Lesson 4-2.		
Configuring Dial-up Internet Access		63
Connecting to the Internet the Easy Way: Using the PPP Dialer		66
Lesson 4-3.		
Configuring DSL and Cable Internet Access		67
Cable Setup		67
DSL Setup: An Introduction		68
Setting Up DSL: Bridged, Dynamic IP		69
Setting Up DSL: Bridged, Static IP		71
Setting Up DSL: PPPoE Dynamic IP		73
Setting Up DSL: PPPoE Static IP		75
Lesson Review		76
What's to Come		76

Chapter Five Laying the Foundations:	
Linux As a LAN Server	77
Presentation	78
The Scenario	78
Lesson 5-1.	
Hardware and Addresses	82
Hardware Connections	82
Computer (IP) Addresses	86
The Scenario	89
Lesson 5-1 Review	90
Lesson 5-2.	
Setting Up a Dynamic Server and Clients	91
Server Configuration	92
Linux Client Configuration	103
Windows 2000 Client Configuration	104
Windows 98 Client Configuration	106
Testing the Connection	106
Lesson 5-2 Review	107
Lesson 5-3.	
Setting Up a Domain Name System Server for the LAN	107
What a DNS Server Does	107
Configuring a DNS Server for Development, Ltd.	108
Client Configuration	112
Starting DNS	114
Testing the Connection	114
Lesson 5-3 Review	114
What's to Come	115
 Chapter Six Linux As an Internet, File/Print,	
E-mail, Web, and Application Server	117
Lesson 6-1.	
Setting Up an Internet Server for the LAN	120
Server Configuration	120
Linux Client Setup	122
Windows 2000 Client Setup	123
Windows 98 Client Configuration	124
Testing the Connection	125
Lesson 6-1 Review	125

<i>Lesson 6-2.</i>	
<i>Setting Up a File Server</i>	125
The Design Stage	126
Users, Groups, and Permissions	128
Section Review	138
Connecting Linux Clients to the Server with NFS	139
Connecting Windows Clients to the Server with Samba	142
Using NETFS to Remount Shared Directories	146
Section Review	146
<i>Lesson 6-3.</i>	
<i>Setting Up a Print Server</i>	146
A Linux Print Server	147
A Windows Print Server	149
The Scenario	150
Lesson 6-3 Review	151
<i>Lesson 6-4.</i>	
<i>Setting Up an Internal E-mail Server</i>	151
Setting Up a Linux E-mail Server	151
Configuring Netscape Communicator 4.78 in Linux	153
Configuring Microsoft Outlook in Windows	155
Lesson 6-4 Review	156
<i>Lesson 6-5.</i>	
<i>Setting Up a Local Web and Database Server</i>	156
The Apache Web Server	156
Lesson 6-5 Review	163
<i>Lesson 6-6.</i>	
<i>Adopting Postgres</i>	163
How a Small Business Can Adopt Postgres	164
Installing and Using pgAdmin	165
PgAccess	171
phpPgAdmin	173
Lesson 6-6 Review	174
<i>What's to Come</i>	174

Chapter Seven Serving a Web Site and Mail to the Internet175

<i>Lesson 7-1.</i>	
<i>Self-Hosting or Contracting Out?</i>	175
Type of Site and Expected Traffic	175
Security	176

Lesson 7-2.

<i>Administrative and Technical Issues</i>	177
A Static Address	177
Registering a Domain Name	178
Obtaining or Creating a Nameserver	179
E-mail Relaying	179
Security	180
<i>Chapter Review</i>	183
<i>Conclusions on Self-Hosting a Web Site and E-mail</i>	183
<i>What's to Come</i>	184

Chapter Eight Linux As a Workstation Solution185*Lesson 8-1.*

<i>Setting Up E-mail and the Web Browser</i>	187
Configuring Netscape Communicator E-mail	188
Configuring Netscape Navigator	192

Lesson 8-2.

<i>Installing and Setting Up Office Applications</i>	193
Downloading and Installing StarOffice	195
Initial StarOffice Configuration	198

Lesson 8-3.

<i>Setting Up a Linux Workstation Printer</i>	199
Setting Up a Printer in StarOffice	201
Lesson Review	202

Lesson 8-4.

<i>Word Processing in StarOffice Writer</i>	202
Getting Help	204
Revising Documents	204
Inserting Graphics and Drawings	204
Address Books, Templates, and Mail Merge	206

Lesson 8-5.

<i>Creating Spreadsheets in StarOffice Calc</i>	213
Creating Scenarios and Using Goal Seek in StarOffice Calc	215

Lesson 8-6.

<i>Creating Presentations in StarOffice Impress</i>	218
Starting a New Presentation in StarOffice Impress	218

Lesson 8-7.

<i>Sharing Data between Applications</i>	222
Importing Spreadsheets and Graphs into StarOffice Writer and Impress	222
Sharing Data with Other Applications	225

<i>Lesson 8-8.</i>	
<i>Working with Microsoft Office Files</i>	<i>225</i>
Lesson Review	230
<i>Lesson 8-9.</i>	
<i>Using Netscape 4.7 and Mozilla E-mail</i>	<i>231</i>
Using Netscape Mail	232
Configuring and Using Mozilla	233
<i>Lesson 8-10.</i>	
<i>Calendaring</i>	<i>235</i>
Lesson Review	236
<i>What's to Come</i>	<i>237</i>
 <i>Chapter Nine System Management</i>	 <i>239</i>
<i>Lesson 9-1.</i>	
<i>Tracking Memory and CPU Usage</i>	<i>239</i>
Free	239
Xosview	241
Ps	242
Top	243
GTop	244
<i>Lesson 9-2.</i>	
<i>Process Control</i>	<i>246</i>
Kill	247
Killing Programs in Top and GTop	247
<i>Lesson 9-3.</i>	
<i>Techniques to Keep Track of System Health</i>	<i>248</i>
Multiple Terminals	248
Log Files	248
<i>Lesson 9-4.</i>	
<i>Package Management</i>	<i>250</i>
Ret Hat Package Management	250
The Red Hat Network	252
<i>Lesson 9-5.</i>	
<i>Recovering from X Window Failures and Shutting Down</i>	<i>254</i>
Shutting the System Down	254
Lesson Review	255
<i>What's to Come</i>	<i>256</i>

<i>Chapter Ten Command-Line Operations</i>	257
<i>Lesson 10-1.</i>	
<i>Linux Directories and Navigation</i>	257
The Linux Directory Structure	258
Creating and Removing Directories	260
Navigation	261
<i>Lesson 10-2.</i>	
<i>Manipulating and Editing Files</i>	265
The cp, mv, rm, and mtools Commands	266
Editing Files with Vi	269
Lesson Review	270
<i>Lesson 10-3.</i>	
<i>Mounting Partitions and Network Shares</i>	271
Mounting Windows Partitions within Linux on a Dual-Boot Machine	271
Mounting a Windows Share on the LAN from within Linux	272
<i>Lesson 10-4.</i>	
<i>Command-Line Networking</i>	273
FTP	273
Telnet	276
Lesson Review	276
 <i>Appendix A Making a Boot Disk</i>	277
 <i>Appendix B Linux Configuration Files</i>	279
 <i>Appendix C Dynamic Domain Name Service (DDNS)</i>	283
<i>Linux Server Configuration</i>	284
Producing the Security Key	284
Configuring the Linux Server Files	285
<i>Linux Workstation Configuration</i>	287
<i>Windows Workstation Configuration</i>	289
<i>Starting DDNS</i>	289
 <i>Index</i>	291
